

Adding a Primary Diagnosis to the Diagnosis List (effective 9/28/15)

These instructions are to be used to add a new diagnosis for clients with completed Admissions after WITS has been updated with DSM-5\ICD-10.

1. **Getting here:** Login, select the **Facility**, select **Client List** on the Navigation Pane (left menu) to generate the Client Search Screen, find client, click  and select **Activity List**.

The screenshot displays the WITS Idaho-WITS Training interface. The top navigation bar includes the WITS logo, the text "Idaho-WITS Training", and a "Logout" button. Below the navigation bar, the user's role is "Staff, Clinical" and the location is "D Williams Agency, Alternative Treatment Location". The main content area is divided into a left navigation pane and a right main area. The left pane lists various options, with "Client List" selected. The right main area contains a "Client Search" form with fields for Agency, Facility, First Name, Last Name, SSN, and DOB. Below the search form is a "Client List (Export)" table with columns for Actions, Unique Client #, Full Name, DOB, SSN, and Gender. A client record for "Lion, E" is visible, with a "Profile" button highlighted. A red circle with the number "1" is placed over the "Profile" button, and a red arrow points from it to the "Activity List" button in the client record's action menu.

Actions	Unique Client #	Full Name	DOB	SSN	Gender
 Profile Activity List Linked Consents	112051610000054	Lion, E	12/5/1961	000-00-0000	Male

Actions	Agency	Unique Client #	Client Name	DOB	SSN	Gender

2. Select **Diagnosis List** on the Navigation Pane.
