

WITS Changes – 17.16.0 Release (Mental Health)

4/14/2015

In the 17.16.0 Release 4 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Appointment Search: The appointment search criteria are cleared after reviewing an encounter. **Resolution:** Search criteria are now saved after reviewing an encounter and returning to the appointment search screen.
- 2) Client Profile: Client Group Enrollment link is missing from navigation when in the Employment section. **Resolution:** The Client Group Enrollment link is displaying in the left column in the Client Profile Menu when user clicked the Employment link.
- 3) Group Notes: When creating a Misc. Note from the Group Session screen, the duration does not calculate on the Misc. Note. **Resolution:** Misc. Notes created from Group Session Notes now calculate the duration.
- 4) Consent: Error screen when trying to review a Consented Admission. **Resolution:** Viewing a consent Admission will no longer result in an error.

Below you will find a summary of the change to WITS for the 17.16.0 release (which took place April 16, 2015). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 17.16.0.

Client

A Suffix field has been added to the Client Profile screen. The Suffix field is a text field and is optional.

Client List/Episode List

WITS will now automatically change the context facility based on the location of an episode, rather than having to go through the My Settings - Change Facility screen. This feature is applicable for staff assigned to multiple facilities at which the episodes exist, as well as for staff having the WITS Administrator, and/or ATR Administrator roles.

Client Profile

The SSN rule has been changed so that WITS will now allow a SSN to be duplicated where the first five characters are 0s and the last 4 digest already exist within an agency (example: 000-00-1234).
