

## WITS Changes – 18.11-18.12.1 Release MH

09/02/2016

In the 18.11-18.12.1 multiple bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

Issue	Resolution
<b>Claim Batch Generator: Not batching all claims if Rendering Staff is missing</b>	Fixed an error that would occur if the Rendering Staff is missing on the Encounter record.
<b>Treatment: Tabbing does not tab through all the fields on Treatment/Dispensary Ordering screen (ID)</b>	Tabbing order on Treatment/Dispensary Ordering screen now include all editable fields, in a logical order.
<b>Treatment: No vertical scroll bar for Dispensary Ordering List (ID)</b>	A vertical scroll bar is added to the dispensary order table making it easier for the users to access the "Add New" link
<b>Staff Types: Update clinical indicator on staff types</b>	Clinical Indicator values are updated for staff types. And staff members will be filtered by the clinical indicator of their staff types, on certain screens (Tx Plan: Planned Services, Tx Plan: Medication, and Client Diagnoses screens).
<b>Dispensary: Getting 'required fields are missing' error and edited values are not saving for 'Physical Count' field</b>	Required fields are missing error message will not be displayed when Adjustment Reason is updated with different value on Dispensary Inventory Profile screen. The Quantity on Hand column will display the newly edited value and not the initial value, when screen is not saved after entering the initial value.
<b>Formatting: Users cannot scroll down on text boxes using the "down arrow"</b>	Text boxes are formatted so that the expand arrow does not overlap the scroll down button and the users can now easily scroll without having to resize the Text box
<b>Treatment Plan: User cannot make changes on it because of timeout yellow screen</b>	Fixed a timeout issue that could occur when editing a Treatment Plan.
<b>Tx Plan: Unable to get out of Edit Diagnosis screen due to 'Save or Cancel' loop</b>	Edit Diagnosis screen can be saved without any error messages when navigated from Plan Outline screen under Tx Review
<b>IJOS: User gets connection failure message when trying to sync (ID)</b>	A connection failure no longer occurs when trying to sync.

Below you will find a summary of the change to WITS for the 18.11-18.12.1 release (which took place \_\_). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 18.12.1

1. There are multiple updates to the Staff Member module in WITS.

- a. Professional Qualifications License Category: multiple values were added or updated with standard abbreviations.
    - i. Certified Marriage and Family Therapist (MFT)
    - ii. Associate Marriage and Family Therapist (AMFT)
    - iii. Certified Social Worker (CSW)
  - b. Professional Qualifications Professional Qualification Category: a value was updated to have a standard abbreviation:
    - i. Certified Marriage and Family Therapist (MFT)
  - c. A Status column has been added to the Agency Account Search screen.
  - d. Language: additional values were added
    - i. Spanish languages/dialects spoken in Mexico and South America.
2. "Fee Determination: New field ""Reason Not Signed"" is visible when No is selected for ""Has client signed paper form?". When a reason is selected for not signing, all the fields under Allowable Monthly Deductions will become optional and the Fee Percentage will be 100%.
