

WITS Changes – 17.24.3 Release (Mental Health)

8/13/2015

In the 17.24.3 Release 3 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Clinical Dashboard/Program Enrollment: Getting Yellow Screen when clicking 'Cancel' or 'Finish' on PE accessed through Clinical Dashboard. **Resolution:** Clinical Dashboard: Resolved the yellow screen issue that occurred when user clicked 'Cancel' or 'Finish' on a Program Enrollment that was accessed through the Clinical Dashboard.
- 2) Claim Batch: Getting error:" A script on this page may be busy, or it may have stopped responding. You can stop the script now..." **Resolution:** Claim Batch List: Searching for and clearing search for a Claim Batch list will no longer displaying an error.
- 3) Intake: Users were allowed to close case even though outcome measure is still in progress. **Resolution:** The case is no longer allowed to be closed unless the 'outcome measures' is complete.

Below you will find a summary of the change to WITS for the 17.24.3 release (which took place August 14, 2015). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 17.24.3.

Allergies

The "Allergen" field on the Allergy Profile screen now performs 'Contains Like' search.

GAIN

The Substance Note fields have been made longer to accommodate changes in the GAIN note fields. The modified gain_grrs table has been modified, changing multiple fields from varchar(100) to varchar(max); modified gain_grrs_ssrs view accordingly. This will resolve the error that users were getting while trying to download the GAIN summary with long values in the GAIN Substance Note fields.

Mental Health Assessment

The print versions of the IDMH Assessment have been modified to mask the first 5 digits of SSN for all four versions of the IDMH Assessment Report (Common Assessment, Medicaid Diagnostic, Medicaid Intake, Medicaid Functional reports).

Idaho Standard Mental Health Assessment
