

WITS Changes – 17.3.4 Release (Mental Health)

9/19/2014

In the 17.3.4 Release 8 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Referral: Typo in Status Value **Resolution:** The spelling/wording of the 'Referral Status Code' for referrals is changed to "Referral Terminated." Both the 'Referral Status Codes' mover box and the 'Referral Status' column in list screen reflect the correct value.
- 2) Support Ticket: Searches using the 'Reporting User' and 'End User' fields are not returning results for those with professional credentials **Resolution:** Searches using the 'Reporting User' and 'End User' fields will now return results for those users with professional credentials.
- 3) Dispensary Ordering: 'Insert Failed' error for large amount of text entered in Comments and Instructions fields **Resolution:** No failed error or info message is displayed when large amount of text is entered in Comments and Instructions text areas.
- 4) System Administration>Community Hospital A/P: Slow response **Resolution:** Limited the search results to only return 1000 records at a time.
- 5) GAIN SS: Timing out with stack trace error **Resolution:** Fixed an error that could occur when viewing the report.
- 6) Dispensary: Medication Labels will not print to brother printer **Resolution:** Medication Labels can be printed successfully using Brother Printer.
- 7) Group Session: Do not allow End time to be before Start Time **Resolution:** On save, the End Time is not allowed to be before Start Time.
- 8) Scheduler: Deleted appointments keep coming back **Resolution:** Deleted appointments remain deleted in the scheduler

Below you will find a summary of the change to WITS for the 17.3.4 release (which took place September 22, 2014). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 17.3.4.

17.3.0

Assessments

WITS will now reflect the user who performed the GAIN in the Evaluator field, and the date of the GAIN GRRS assessment was conducted in the Screening Date field on the recommendation and referral summary rather than the user who downloads the GRRS into WITS and the date that it is downloaded.
