

## WITS Changes – 17.7.0 Release (Mental Health)

11/10/2014

In the 17.7.0 Release 7 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Intake & others: Erroneous 'Save or Cancel' Error. **Resolution:** Fixed an erroneous "You must save or cancel your changes first." error that would occur when no changes had been made.
- 2) Client List: The wild card searches of SSN are not working. **Resolution:** The SSN parameter is now again searchable using "\*" as a wildcard.
- 3) Clinical Dashboard: The "Provide Feedback" action causing yellow screen. **Resolution:** Clicking the "Provide Feedback" action button is no longer causing a yellow screen to occur.
- 4) Assessments: Remove extra error messages returned on GAIN. **Resolution:** Removed the references to the "error logs" in error messages on the GAIN.
- 5) Diagnosis: Missing word in tertiary dx error message. **Resolution:** The word "specify" is now added to the wording of the error message "To specify a tertiary diagnosis, the primary and secondary diagnosis must first be specified, it had been mistakenly omitted previously.
- 6) Diagnosis: Users were getting 'Required fields are missing' error when attempting to delete a Diagnosis. **Resolution:** Corrected a 'Required fields are missing' error when attempting to delete a Diagnosis.
- 7) Group Notes: Tab key skips the "Billable" field. **Resolution:** Click on field 'Group Name' and then hit TAB many times - it does not skip "Billable" field.

WITS will be updated with the 17.7.0 release November 12, 2014. When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 17.7.0.
