

WITS Changes – 18.2.6 Release (Mental Health)

7/1/2016

In the 18.2.6 Release 7 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

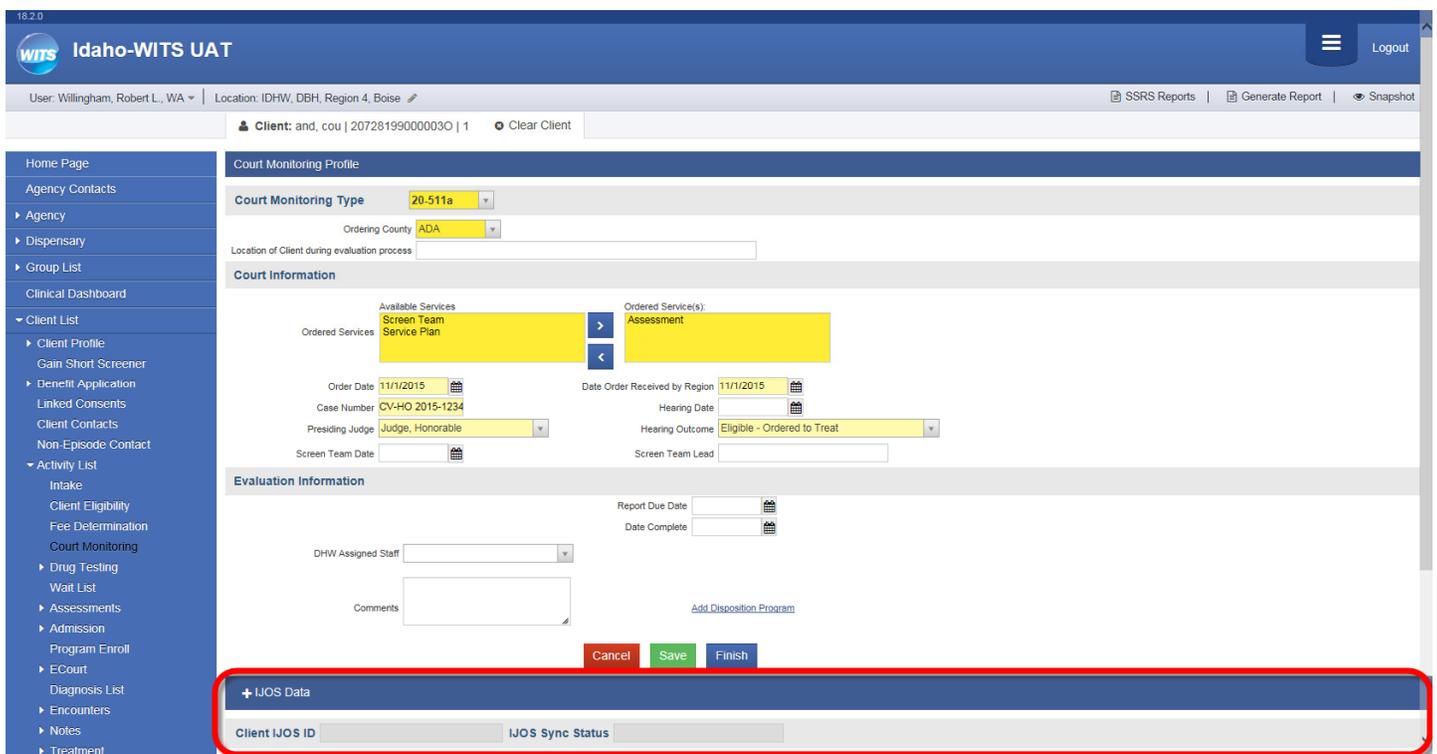

- 1) Menus: Not displaying upon refresh. **Resolution:** Implemented a change to get around an Internet Explorer error (in IE10 or earlier versions) that was causing the left menu links to be hidden when search screens return a large number of records.
- 2) Scheduler: Yellow error screen when creating Group Session from Scheduler. **Resolution:** A yellow screen no longer occurs when creating or viewing a group session from a scheduled group appointment.
- 3) WITS: Accessibility Scan. **Resolution:** Implemented modifications as follows to make JAWS compatible with EA Architecture changes introduced in the 18.0 release:
 - ~ The left menu is now JAWS compatible again.
 - ~ 'Fetching' dropdowns are now JAWS compatible again.
 - ~ Dual list box fields are now JAWS compatible again.
 - ~ List titles are now read.
 - ~ 'Export' links are now read with more info regarding the corresponding list.
 - ~ For Maine: Admission and Discharge modules are now JAWS compatible.
- 4) Various: Drop down boxes are too narrow to view selected values. **Resolution:** Fixed the issue where the drop down fields are too narrow to select the values. It is now fixed to show the drop down fields with appropriate width.
- 5) Client Eligibility/Treatment Plan: When you print a Client Eligibility Letter, the client name is missing & Clicking 'Generate Report' for a Tx Plan displays an error. **Resolution:** When the Client Eligibility Letter is printed, it now displays the Client Name. The yellow screen issue that occurred while clicking Generate Report for a Tx Plan is fixed.
- 6) Dispensary: Getting kicked out of Dispensary when printing labels. **Resolution:** The issue that was causing the label printer to not work has been resolved.
- 7) Yellow Page Errors: Miscellaneous Note Detail, Follow up & Discharge from the Consented Activity List and Generate Report from Discharge. **Resolution:** Fixed yellow page errors that occurred while accessing the Miscellaneous Note Detail, Follow up & Discharge from the Consented Activity List and also the Generate Report from the Discharge screen.

Below you will find a summary of the change to WITS for the 18.2.6 release (which took place January 9, 2016). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 18.2.6.

Court Monitoring

Created a panel on the Court Monitoring Profile screen to display data for WITS-IJOS Messaging.

Notes

New navigation controls have been added to the Encounter screen to move from one Encounter record to another without going back to the list. This capability is not enabled in instances with custom encounter screens.
