

WITS Changes – 15.1.0 Release (Mental Health)

3/11/2014

In the 15.1.0 Release 4 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Change Password: Possible incorrect error message was being displayed **Resolution:** The error message now states "Current password may be incorrect or you may be using a password you have used before. Please verify your password or change the new password."
- 2) Group Session: Yellow screen occurs upon creating group session from the scheduler (a scheduled group) then clicking review for a client **Resolution:** Previously, the system should display an error if the Review link was used for a client after the group session was created from the Scheduler. This error has been fixed now the Individual Note screen loads correctly.
- 3) Consent: Criminal Justice consent report showing wrong UCN **Resolution:** The correct UCN now appears in the header of the Criminal Justice Consent form.
- 4) Claim Batch: Unable to remove a claim from a batch **Resolution:** Previously when attempting to remove at least 1 claim from a claim batch the system would produce a yellow page and not remove the claim. This has been corrected.

Below you will find a summary of the changes to WITS for the 15.1.0 release (which took place March 13, 2014). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top right portion of your screen will say 15.1.0.

The screenshot shows the footer of the WITS system. On the left is the 'Idaho-WITS Training' logo. In the center, user information is displayed: 'User: Willingham, Robert, WA', 'Loc: Department of Health & Welfare, DHW-Boise', and 'Client:'. To the right of the user information is a 'Printable View' icon. Further right is the 'MedlinePlus' logo and the version number '15.1.0'. On the far right is a 'Logout' button with a red arrow icon.

Code Table

Enabled codes tables for Conviction Level, ECourt Criminal Justice Phase, ECourt Behavior, Drug Test Result.

Consent Form

The printable consent form displays all signature lines at the bottom of the form even if there is an electronic signature image displayed.
