

## WITS Changes – December 2013, Rev. 3 (Mental Health)

2/18/2014

In the December 2013, Rev. 3, 19 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Referrals: Creating a Referral from the Consent screen throws yellow page error **Resolution:** The yellow screen error that was occurring when creating a Referral from the Consent screen will no longer appear.
- 2) Client Profile: Duplicate client check message is not user-friendly **Resolution:** Duplicate client check message will now be user-friendly and will not display "Insert Failed".
- 3) Admission/Discharge: The Tobacco Section is appearing in Generate Report when it is turned off **Resolution:** Tobacco section will no longer appear in Generate Report when it is turned off on screen.
- 4) Program enrollment: The user was unable to end a program enrollment if there was another program enrollment open at the same time that had the same level of care. **Resolution:** Users will now be able to end a program enrollment as long as the end date is less than the start date of the overlapping program enrollment with the same level of care.
- 5) Gain GRRS: The Dx was duplicated upon each successive Download/Update of the GRRS **Resolution:** The diagnoses shown on the GRRS now appears as entered in the assessment regardless of how many times it is downloaded/updated.
- 6) Intake: Unable to edit or manually close an intake **Resolution:** Previously, some customers were receiving errors when editing or attempting to close an intake, that there was already one of this type (ATR or Non-ATR) present. The logic has been corrected so that existing intakes can be updated or closed now.
- 7) Announcement: A user with the agency administrator role could create Announcement for all agencies **Resolution:** Implemented a change that prevents Announcements from being seen outside of their home agency if created by agency administrators.
- 8) Admission - Financial/Household: "Months Emp in Last 6 Months" field allows entry of numbers greater than 6 **Resolution:** Financial/Household - Changed the "Months Emp in Last 6 Months" field to prevent entry of a value larger than "6" and corrected the spelling of the word "Employment" in the corresponding error message.

- 9) Client Profile: Yellow page error on reviewing Consented client profile **Resolution:** The yellow page error no longer appears on reviewing Consented client profile when the client profile in the sending agency is complete.
- 10) Group Roster: Clients with active episodes are being inactivated in group roster list **Resolution:** Resolved the issue where clients with active episodes were being inactivated in the group roster list.
- 11) Group Roster: Clients with closed episodes are not being de-activated in group roster list **Resolution:** Fixed a bug where, when there are two cases open for a single client, the nightly task processor would not deactivate the Client from the Group Roster even when the closed Intake was the one with a CPE linked to the Group.
- 12) Notes: The Add Notes functionality on Encounter and Misc Notes uses incorrect formatting for staff name and credentials **Resolution:** The Add Notes functionality on Encounter and Misc Notes now uses the correct formatting for staff name and credentials.
- 13) System-wide: "You must save or cancel your changes first" message appears as warning instead of an error **Resolution:** Changed the "You must save or cancel your changes first" warning message to an error message for instances where one attempts to navigate away from screens with unsaved changes.
- 14) Staff: Slow Performance and Webpage not displayed for large number of Assigned Facilities **Resolution:** Corrected an issue where users would get slow performance and webpage timeouts when there was a large number of assigned facilities.
- 15) Scheduler: Unable to edit or mark an appointment kept - required fields missing error is displayed **Resolution:** Previously, you were unable to change an appointment, the system would prompt that required fields were not filled in, even though there were no visible required fields missing on screen. This problem has been resolved.
- 16) Client Profile: Clicking on Generate Report produces a yellow screen error **Resolution:** Resolved the issue where clicking the Generate Report button produced a yellow screen error.
- 17) Assessments: Yellow Screen occurs when there is no connection to CAFAS or PECFAS site. **Resolution:** On the CAFAS/PECFAS Profile screen, a yellow screen no longer occurs when clicking "Perform CAFAS", "Perform PECFAS", or "Download Results" when a connection to the FAS Outcomes site cannot be established.
- 18) Consented Activity List: Yellow page occurs when reviewing an 'in progress' consented client profile **Resolution:** A yellow screen no longer occurs when reviewing an "In Progress" consented Client Profile.

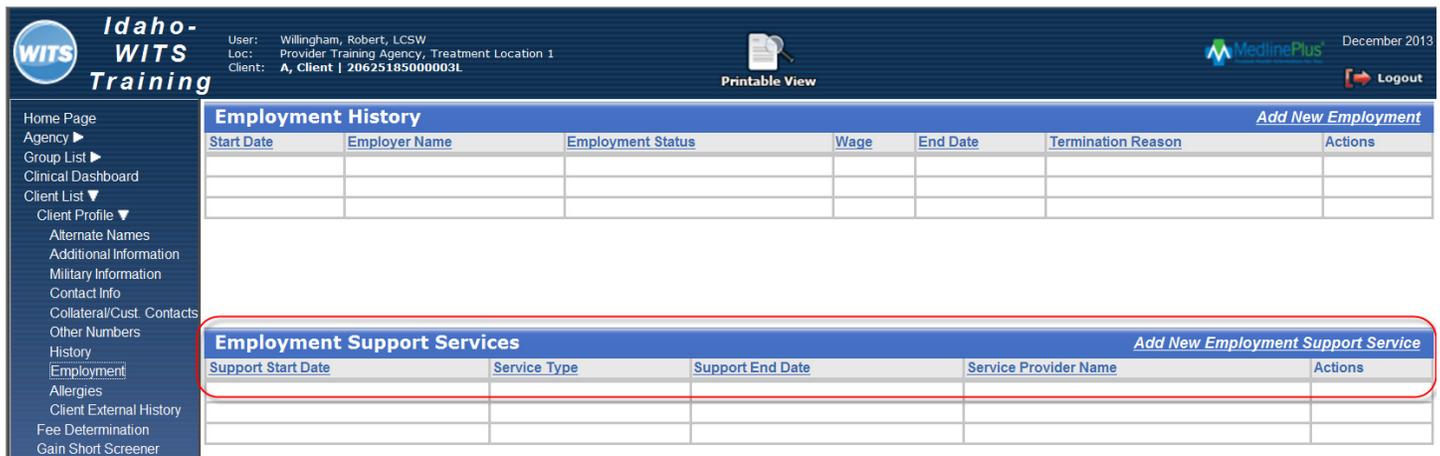

19) Activity list: Waitlist menu item is missing **Resolution:** Previously with the Agency Waitlist roles, the waitlist menu item was not appearing in the client activity list. This has been fixed.

Below you will find a summary of the changes to WITS for the December 2013, Rev. 3, release (which will be pushed with the January 2014, Rev. 1 release). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top right portion of your screen will say January 2014, Rev.1.

Client Employment History

The Employment History screen has been updated to now include Employment Services List and Profile Screens.

Program Enrollment

An information message was added at program enrollment selection and save/finish when the client's age is not within the max/min range of the program enrollments age group.

System

The WITS system has been upgraded to use Silverlight 5.
