

Internet Explorer 10 and 11 Spell Check

Verifying Spell Check is Turned On for Internet Explorer and Adding Words to the Dictionary

1. **Getting here:** Open Internet Explorer. The menu bar may be hidden.
2. **Hold the ALT key and left click the mouse at the top of the screen.** Release the ALT Key and the menu bar will temporarily display.

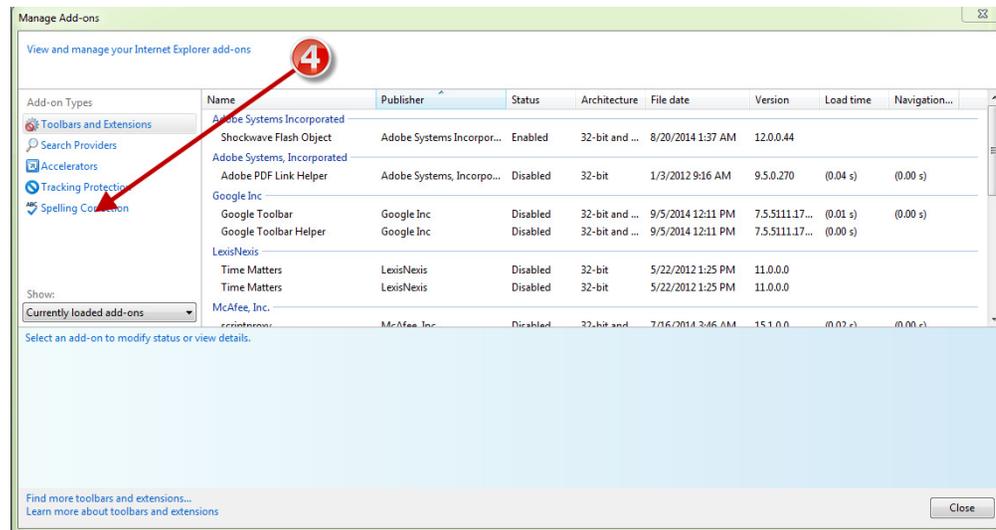

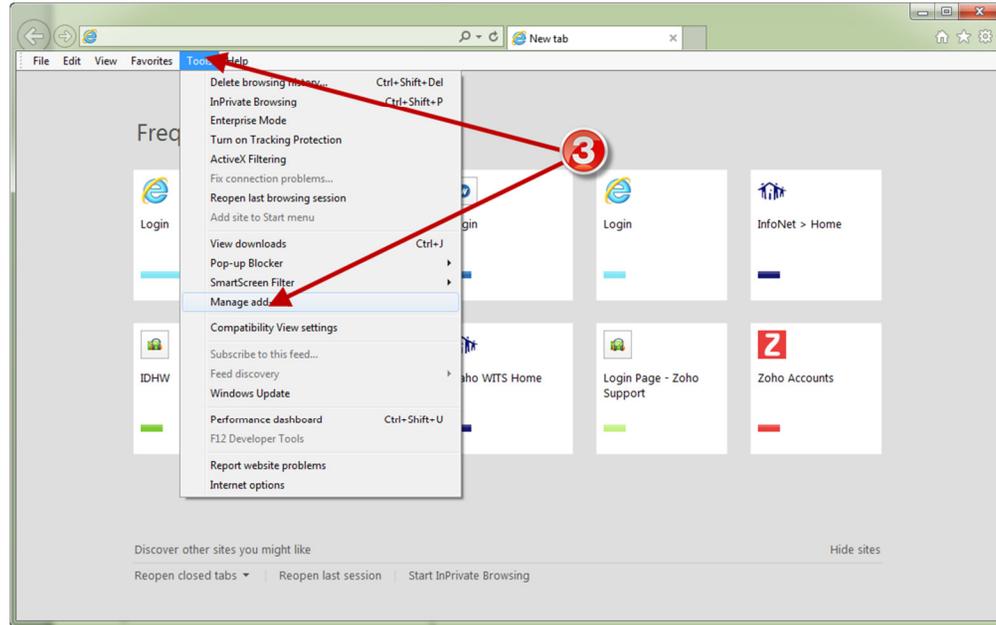

OR

Right click the mouse at the top of the screen and check Menu Bar. Using this option will keep the Menu Bar at the top of the window.

3. Click **Tools** and click **Manage add-ons**.

4. Click **Spelling Correction**.

5. Verify that **Enable spelling correction** is checked.

6. Click **Close**.

7. When in WITS, words that are not in the Internet Explorer Spell Check dictionary will be underlined in red. **Right click the mouse on the word underlined in red**. Click **Add to Dictionary**.
