

# Clicking on Help Dropdown kicks user to the login Go Screen

Issue: Clicking on the Menu dropdown results in transport to the Login Screen.

Steps to reproduce:

1)

The screenshot shows the Idaho-WITS Training dashboard. The top navigation bar includes the WITS logo, the text "Idaho-WITS Training", and a "Logout" button. Below the navigation bar, the user's name "User: Willingham, Robert L., WA" and location "Location: IDHW, DBH, Region 4, Boise" are displayed. A left sidebar contains a menu with items like "Home Page", "Agency Contacts", "Agency", "Dispensary", "Group List", "Clinical Dashboard", "Client List", "System Administration", "Reports", and "Support Ticket". The main content area shows three status alerts: "There are currently 3 people on this facility's waitlist.", "There are currently 9 people that have been referred in.", and "There are currently 36 support tickets with status 'Pending WITS Admin'.". Below the alerts is an "Announcements" section with a table. At the bottom of the dashboard is an "Alert List" table with one entry: "Consent Creation" for "Testing, 17.25.10 AMH; 206031770000304" with a message "The consent form for this client must be signed within 10 days." and a due date of "11/25/2015". A red arrow points from the menu icon in the top right corner to the "Logout" button.
