

WITS Changes – 18.6 – 18.6.2 Release SUD

4/22/2016

In the 18.6+ 11 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

Issue	Resolution
System-wide: Users have been experiencing slowness.	Various: Improved performance for Authorizations for all instances, and for the Dispensary module and Group Sessions for Idaho-only.
System-wide: Hover menu is off the screen when the list is long in Chrome	Hover Menu: The hover menu on list with many records is re- aligned and displays next to the selected Row in chrome. Also fixed in Edge Browser.
Tx Plan : Goal, Objective, and Intervention read-only section is cutting off text	Read only fields boxes width is increased to fit all the data located at the top of the Goal, Objective, and Intervention screens in the treatment plan problem section. These boxes can be resized by dragging them to view all the existing data.
Vital Signs: Yellow Screen Error when Exporting Vital Signs List to Excel.	System allows the users to export vital signs to Excel without giving a Yellow screen error.
Various: Headers are not frozen.	Headers in the list screens are now frozen and will always remain visible when the users scroll down the lists.
Auth Change Requests: Request link shouldn't be displayed for benefit plan authorizations.	Authorization Change Requests link is not available for Benefit Plan Authorizations on Authorization screen.
Intake: Getting yellow screen error when re-opening closed intake & associating GAIN-SS.	Gain SS: Yellow screen does not display anymore when reopening closed intake and associating Gain SS
GAIN: Blank pages when printing the GRRS.	Print Preview/Print do not display/print any blank pages for GRRS report from WITS. All the pages in the generated report can be viewed and printed in proper format.
Discharge: There is no right arrow to access the Diagnosis screen	On the Discharge screen, the forward arrow has been added from the Treatment Summary screen to the Client Diagnosis screen. It also prompts user with "Close Case" confirmation on the Client Diagnosis screen when the Primary diagnosis is selected.
Claim Batches: Batching is limited to 500 claims.	Claim Batches: The number of claim items that can be batched at one time is no longer limited.
Support Tickets: Not getting email notifications when support tickets are created	Support Tickets: If a user has the "Will Receive Support Ticket Notification" role, then the user will get an email notification when a Support Ticket is created.

Below you will find a summary of the change to WITS for the 18.6+ release (which took place 4/22/2016). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 18.6.2.
