

WITS Changes – 17.5.0 Release (SUD)

11/7/2014

In the 17.5.0 Release 4 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Tx Plan: Change the label from Update Behavioral Health Assessment to Update from Behavioral Health Assessment **Resolution:** The label has been changed from Update Behavioral Health Assessment to Update from Behavioral Health Assessment under Tx Plan.
- 2) System Wide: Multiple wrapping and spacing issues **Resolution:** System wide issues have been corrected.
- 3) System Wide Issues: Spacing, Alignments etc. **Resolution:** Multiple system wide issues have been corrected.
- 4) Billing: Performance is worse/slower in the new UI **Resolution:** Improved performance throughout the module by streamlining relationships between claim items, services, and encounters.

Below you will find a summary of the change to WITS for the 17.5.0 release (which took place November 12, 2014). When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 17.5.0.
