

WITS Changes – 17.7.0 Release (SUD)

11/10/2014

In the 17.7.0 Release 7 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Intake & others: Erroneous 'Save or Cancel' Error. **Resolution:** Fixed an erroneous "You must save or cancel your changes first." error that would occur when no changes had been made.
- 2) Client List: The wild card searches of SSN are not working. **Resolution:** The SSN parameter is now again searchable using "*" as a wildcard.
- 3) Clinical Dashboard: The "Provide Feedback" action causing yellow screen. **Resolution:** Clicking the "Provide Feedback" action button is no longer causing a yellow screen to occur.
- 4) Assessments: Remove extra error messages returned on GAIN. **Resolution:** Removed the references to the "error logs" in error messages on the GAIN.
- 5) Authorization List: Users were getting a yellow screen error when declining an authorization associated with a rejected referral. **Resolution:** When a referral is rejected all authorizations associated with it will now be closed.
- 6) Group Notes: Tab key skips the "Billable" field. **Resolution:** Click on field 'Group Name' and then hit TAB many times - it does not skip "Billable" field.
- 7) Client Balance Statement: Home addresses are not showing up in the 'Client' box. **Resolution:** Home addresses will now appear in the 'Client' box.

WITS will be updated with the 17.7.0 release November 12, 2014. When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 17.7.0.
