

# ASAM: ASAM always populates from the admission

## Issue:

When creating an ASAM, the ASAM will populate from the admission. Subsequent ASAMs will also populate from the admission and not from the most recent ASAM.

## ASAM populated from admission:

The screenshot shows the ASAM — PPC2R form for Client: Wattney, Mark | 1080818000013A | 7. The form is populated with data from the admission. The dimensions and their corresponding levels of risk and care are as follows:

Dimension	Level of Risk	Level of Care
1 - Acute Intoxication and/or Withdrawal Potential	[Populated]	1.0 Outpatient
2 - Biomedical Conditions and Complications	[Populated]	1.0 Outpatient
3 - Emotional, Behavioral, or Cognitive Conditions and Complications	[Populated]	1.0 Outpatient
4 - Readiness to Change	[Populated]	1.0 Outpatient
5 - Relapse, Continued Use, or Continued Problem Potential	[Populated]	1.0 Outpatient

Comments for each dimension are also populated, such as "19717 stated never using any substance." and "During the past year, 19717 rated his overall health as [MISSING DATA]."

## New ASAM information entered:

The screenshot shows the ASAM — PPC2R form for Client: Wattney, Mark | 1080818000013A | 7. The form is populated with new information entered. The dimensions and their corresponding levels of risk and care are as follows:

Dimension	Level of Risk	Level of Care
1 - Acute Intoxication and/or Withdrawal Potential	[Newly entered]	1.0 Outpatient
2 - Biomedical Conditions and Complications	[Newly entered]	1.0 Outpatient
3 - Emotional, Behavioral, or Cognitive Conditions and Complications	[Newly entered]	1.0 Outpatient
4 - Readiness to Change	[Newly entered]	1.0 Outpatient
5 - Relapse, Continued Use, or Continued Problem Potential	[Newly entered]	1.0 Outpatient

Comments for each dimension are also newly entered, such as "Adding comments 1" and "19717 self-reported symptoms consistent with a diagnosis of a mood disorder. 19717 self-reported".

## Subsequent ASAM populates from admission (excluding previously entered comments):

User: Barnes, Joshua | Location: SUD Provider Training Agency, Training Facility | Snapshot

Client: Wattney, Mark | 10808180000013A | 7 | Clear Client

### ASAM — PPC2R

Dimension	Level of Risk	Level of Care	Comments
1 - Acute Intoxication and/or Withdrawal Potential	<input type="text"/>	1.0 Outpatient	19717 stated never using any substance.
2 - Biomedical Conditions and Complications	<input type="text"/>	1.0 Outpatient	During the past year, 19717 rated his overall health as [MISSING DATA].
3 - Emotional, Behavioral, or Cognitive Conditions and Complications	<input type="text"/>	1.0 Outpatient	19717 self-reported symptoms consistent with a diagnosis of a mood disorder. 19717 self-reported
4 - Readiness to Change	<input type="text"/>	1.0 Outpatient	07/28/2016: Discussing the way substance use functions in 19717's life (e.g., what things are usually going
5 - Relapse, Continued Use, or Continued Problem Potential	<input type="text"/>	1.0 Outpatient	Combined with the problems above and risks from the recovery environment below, the following conditions

## Workaround:

When creating a new ASAM, all information entered after the admission must be re-entered.
