

## CMH CANS Next Assessment Due FAQ

Q. How are the Next CMH Assessment Due Dates calculated? I didn't complete the 3-month assessment exactly on the 90-day due date and I don't understand how the dates are calculated.

A. The Next CMH Assessment Due Dates are calculated using 90-day Intervals and the Assessment Date of the Initial Assessment (the first completed CMH CANS Assessment in an episode of care).

	<b>Initial Assessment</b>	<b>3 Month Assessment Due Date</b>	<b>6 Month Assessment Due Date</b>	<b>9 Month Assessment Due Date</b>	<b>12 Month Assessment Due Date</b>
<b>Formulas</b>	Initial Assessment Finalize Date	Initial Assessment Finalize Date + 90 days	Initial Assessment Finalize Date +180 days	Initial Assessment Finalize Date + 270 days	Initial Assessment Finalize Date + 360 days
Dates	2/26/2018	5/27/2018	8/25/2018	11/23/2018	2/21/2019

**Intervals do not start over when an updated assessment is completed. The timeframe or window for interval calculation is +45 or -45 days.**

- The **Initial Assessment** = the first completed CMH CANS Assessment in an episode of care.
- The **3 Month Assessment** = the most recent Assessment completed the episode of care within 90 days of the Initial Assessment that is within the window.
- The **6 Month Assessment** = the most recent Assessment completed the episode of care within 180 days of the Initial Assessment that is within the window.
